

DAILY TOUR

PERFUMES & ANTIQUWEAPONS

DESCRIPTION

Our day begins with a visit of a **pre-Etruscan village** located in a very fascinating area. At our arrival we will meet the archaeologist who will tell us about the so-called Villanoviano period and will lead us to the discovery of the old village that was rebuilt according to the studies of the remains they found here.

Here we will have the possibility of experiencing different types of art and handicrafts of the so-called Villanoviano period. We will have a funny and alchemistic experience creating a new perfume with olive oil ..exactly how it was made in 3000 b. C. The centre has done a study dedicated to the reproduction of all techniques that were adopted for creating perfumes. The results of this study are at your full disposal to enable you to create your PERSONAL Perfume with olive oil. You will have an absolutely unique souvenir to take back home!

After lunch another unforgettable experience is offered to you: learn how to use the antique weapons used for hunting!

Afterwards, we leave the pre-Etruscan village and we go for a delicious Italian cappuccino in another little jewel of the area: the Medieval village of **Civitella Cesi**, perfectly preserved.

THE TOUR INCLUDES

- » Local guide
- » Experiences at the archeological area
- » Lunch at the archeological area (water included)
